

35.BIMU: 7 MONTHS TO THE OPENING OF THE EVENT HYPER-DEPRECIATION WILL BE A GREAT BOOSTER FOR THE TRADE SHOW AND ITS EXHIBITORS

AMONG THE NEW FEATURES IN THIS EDITION: FORUMS ON AEROSPACE & DEFENCE AND ENERGY BI-MU FUTURETECH AWARDS.

Scheduled to take place at fieramilano Rho from 13 to 16 October, seven months before starting, 35.BIMU is in full swing with its organizational activities, at a time when the government authorities are preparing to present the implementing decrees for hyper-depreciation, the measure that will be great booster for the Italian market of production machinery and technologies from now until 2028.

The three-year duration of the incentive will provide a significant stimulus to domestic demand – which, as far as we remained as steady – thus offering BI-MU exhibitors a really unique opportunity to identify users' needs and take advantage of their willingness to invest in new systems.

The collection of applications to exhibit at the trade show continues open, including new confirmations and returns of key players among exhibitors. The staff is also involved in defining all the initiatives that will accompany the event, including the activities in the weekly calendar. For the first time, BI-MU will open on Thursday and close on Friday, taking place over four days, all of which will be working days, as in the case of most events that are exclusively B2B.

Promoted by UCIMU and organised by EFIM – ENTE FIERE ITALIANE MACCHINE, 35.BI-MU has chosen Where it all begins as its slogan for its 35th edition, emphasizing, on one hand, the central role of machine tools, which enable most manufacturing processes and are the main focus of the exhibition. On the other hand, the slogan also highlights the long-standing and enduring tradition of this event. Indeed, 35 editions mean **70 years of uninterrupted organisational activity**.

At 35.BIMU, in addition to machines, BI-MU will give particular visibility to 7 technological themes:

- **Robotics** will be dedicated to robotics, automation, components, systems and artificial intelligence, sponsored by UNIR (Italian Robotics and Automation Association).
- **AMTALY** will be focused on the entire additive manufacturing supply chain, sponsored by AITA (Italian Association of Additive Technologies).
- **BI-MU Digital** will show digital solutions for the smart factory, with advanced software, technologies for connectivity and data security, sensors and self-adaptive systems.
- **Metallurgy and Tooling** will spotlight measuring instruments, testing machines, machine vision.
- **PowerMachines** will have components for mechanical, electrical and pneumatic power transmission, sponsored by FIDERTEC (Association of the Italian Production Chain of Mechanical Technologies and Components for Fluid Power).
- **Heat and Surface Treatments** will be focused on plants and systems for improving the performance of metals.
- A new theme in this edition will be **Tool Tech**, centered on advanced tools for efficient, high-precision production.

An overview of **Renewing & Retrofitting** will complete the product offerings, showcasing a selection of machines and systems, which have been properly refurbished and upgraded to meet the needs of the second-life market, complementary to that of new equipment.

As per tradition, the exhibition will also host the **BI-MUpiù** arena, with a full programme of in-depth cultural, thematic meetings offered by the organisers, exhibitors and experts from the world of industry.

Special focus will be dedicated to some of the most dynamic user sectors in terms of investments and innovation development, such as **Aerospace & Defence** and **Energy**, hosted in the arena on 14 and 15 October. With this focus, the event will offer a unique opportunity to business, offering operators attending the trade show a detailed analysis of the user industry, business opportunities for exhibitors, through the vision of some of the leading figures in these sectors.

For young people, the **Education & Job** project has been confirmed, with **ROBOTGAMES** as its flagship event. This is the automation and robotics contest for high-school students, launching in its second edition.

A new initiative for this edition is **BI-MU FUTURTECH AWARDS**, an award celebrating the most innovative systems and solutions presented at the exhibition. The contest will open on the exhibition on 20 October, with an award ceremony on Friday, 23 October, involving the exhibitors, sponsors and operators. The initiative highlights the value of the trade show to operators as an event capable of disseminating and anticipating the technological advances in the world of industrial production.

Moreover, the programme of events leading up to the exhibition continues. The next two events are on Wednesday, 11 and 12 October, dedicated to the **International Robotics and Automation** in **Technology Museum**, sponsored by UNIR, and **Robotics and Automation** in **Technology Museum**, sponsored by UNIR, and **FUNDAZIONE UCIMU/UCIME FUNDATION**, on Thursday, 18 June, for **Innovative Robotics**.
